Amharic **Native**

English **Professional**

About me

Dedicated React and Laravel Developer With extensive experience in developing robust web applications, I specialize in JavaScript frameworks such as Node.js and React.js, along with Laravel for backend development. Proven ability to design and implement responsive, user-centric solutions that meet high-quality standards and project deadlines.

Committed to fostering a collaborative and innovative work environment while upholding values of honesty, integrity, and punctuality. Passionate about creating impactful digital experiences, leveraging a strong foundation in modern UI/UX design principles using Figma, Tailwind CSS, and Bootstrap.

Driven to deliver efficient, scalable, and intuitive solutions that enhance user satisfaction and support business success.

Experience

Developer and IT Support Specialist

Mar 2023 – Sep 2024

Tewos Technnology Solutions- Addis Ababa, Ethiopia

- Developed high-quality interface components using React.js, Tailwind CSS, and JavaScript.
- Designed and implemented responsive front-end interfaces for the company's delivery platform.
- Created interactive mobile app prototypes in Figma to streamline design-to-development workflows.
- Managed IT operations in the sub-city field office, ensuring system reliability and maintenance.
- Collaborated with cross-functional teams to align user experience and platform functionality with business objectives.

Full Stack Developer (Freelance)

Jul 2023 - Oct 2024

Nero's School – Adama, Ethiopia

- Built a school management system with Laravel, featuring:
- Advanced attendance tracking for staff and students.
- Automated admission processes and leave management systems.
- Parent-teacher communication modules with secure features.
- Comprehensive grading and performance tracking tools.
